Transforming Businesses Digitally with **Innovation and Strategic Excellence.**

www.techaxion.com

About Our Organisation

Strategic Partner

Backed by the Kunvarji Group, a diversified business conglomerate with over six decades of excellence and industry leadership.

Global Footprint

Headquartered in Ahmedabad, serving clients across multiple industries with a vision to expand globally.

Innovation Hub

Specialized in building advanced software solutions and driving digital transformation for modern businesses.

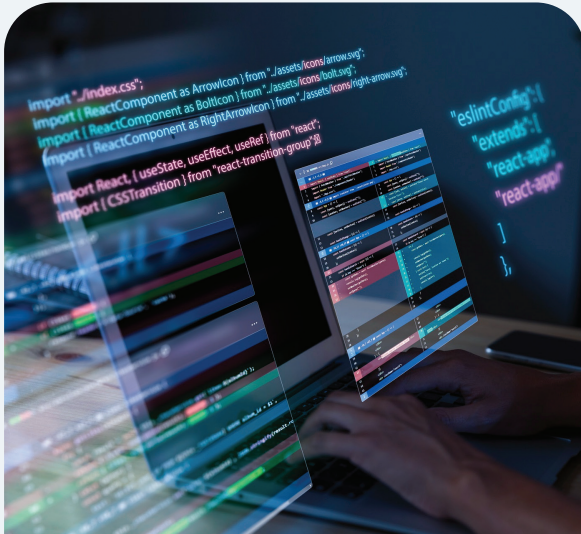

Core Philosophy

Built on innovation, integrity, and collaboration, empowering teams to create impactful digital solutions.

Our Service Ecosystem

Custom Development

Tailored software solutions designed with scalable architecture to address unique business challenges.

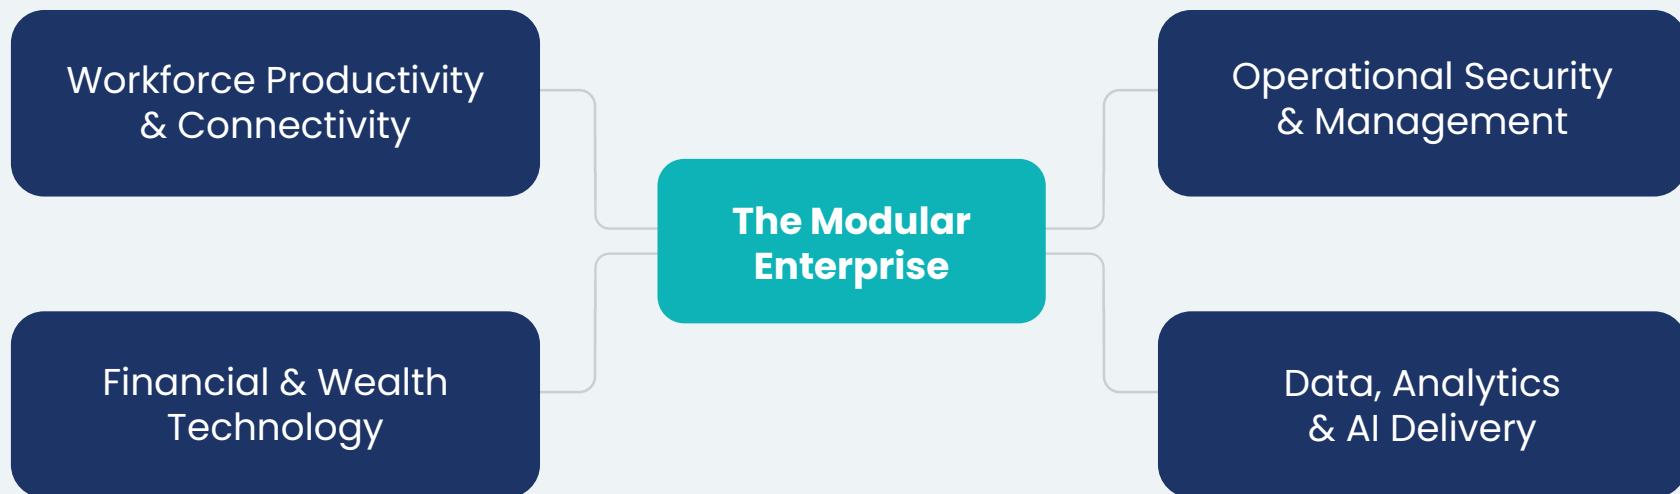

Digital Transformation

Strategic technology consulting to help businesses modernize operations through cloud, automation, and AI.

Solutions Built for Enterprise Scale

A comprehensive suite of digital modules designed to integrate seamlessly across your organisational structure.

Digital Visiting Card

A smart and eco-friendly networking solution enabling professionals to instantly share contact details, portfolios, and business links through NFC and QR technology.

Seamlessly integrates with enterprise CRM systems, ensuring every lead and connection is captured and managed efficiently.

Daily Hustle Tracking

A gamified productivity and task management platform built specifically for sales teams and on-ground workforce operations.

- Tracks daily KPIs and performance metrics in real-time.
- Monitors field activities, attendance, and live location data.
- Enhances productivity through transparent reporting, motivation, and performance-driven insights.

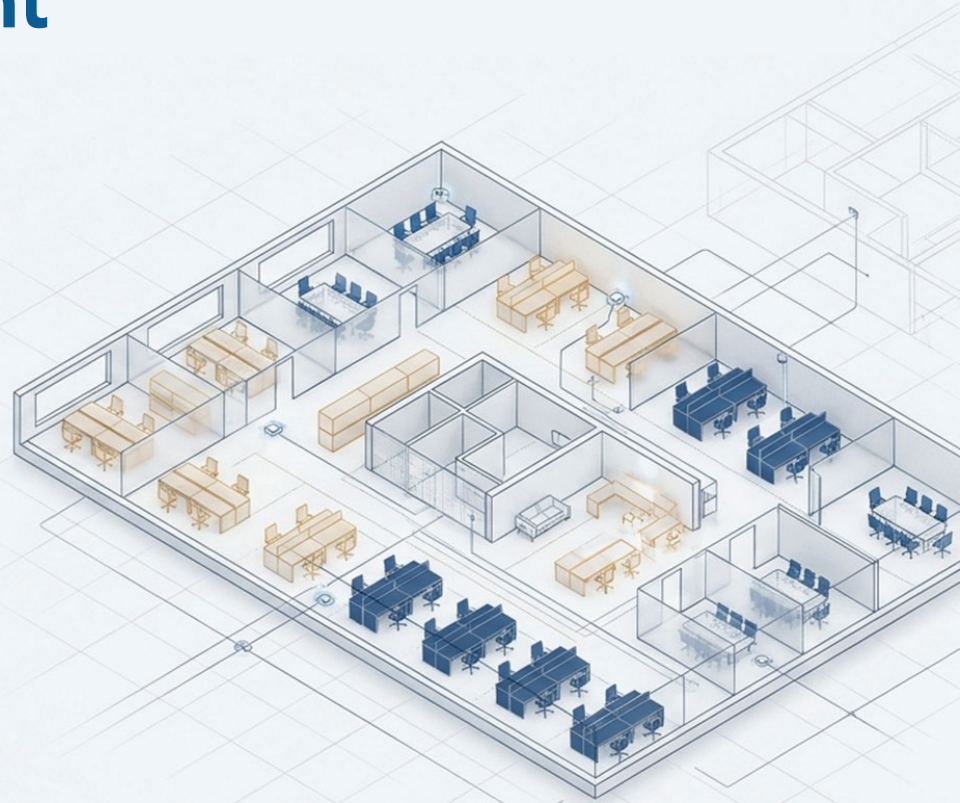

Floor Plan Management

Interactive Mapping: Smart and intuitive seating layouts with real-time room and workspace visualization.

Smart Booking: Seamless meeting room reservations with live availability and instant synchronization.

Employee Management: Simplified desk allocation and personnel tracking for better workspace coordination.

Workspace Insights: Centralized analytics dashboard for optimizing office space utilization and operational efficiency.

REPOS (Registration of External Personnel in Office System)

- A secure and automated visitor management platform designed to streamline external personnel registration, enhance security protocols, and modernize the front-desk experience.
- Digitizes visitor check-ins, automates security clearances, issues instant digital passes, and maintains real-time access logs to ensure enhanced facility security and compliance.

Vendor Payment Approval System

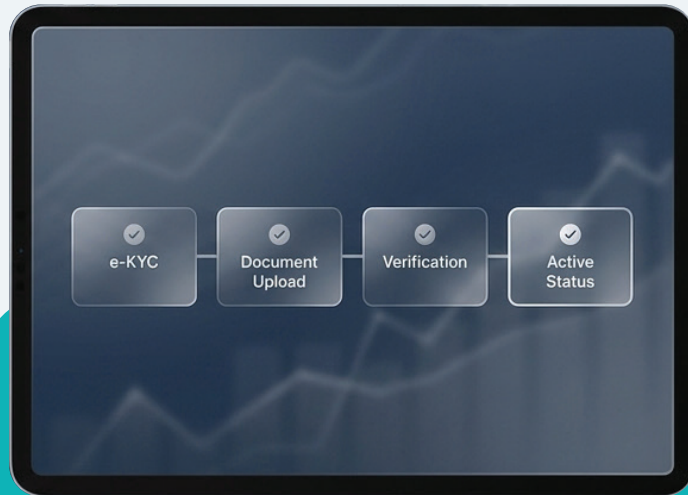

- An automated financial workflow tool that completely eliminates manual bottlenecks in the procurement cycle.
- Digitises invoice capturing, enforces multi-tier approval hierarchies, and integrates directly with core banking APIs for seamless, error-free vendor disbursements.

Sub-broker Onboarding

A frictionless, fully digital Partner onboarding platform explicitly built for the financial sector to rapidly scale broker networks with high speed acquaintances.

Impact: Streamlines e-KYC, automated document verification, and complex regulatory compliance—dramatically reducing turnaround time from several days to mere minutes.

RMS / Wealth Utilities (Risk Management System)

A robust, high-performance suite of utilities designed for wealth managers, institutional investors, and Stock Brokers.

- Provides real-time risk evaluation algorithms.
- Automated margin monitoring.
- Deep portfolio analytics to ensure compliance and safeguard assets in highly volatile financial markets.

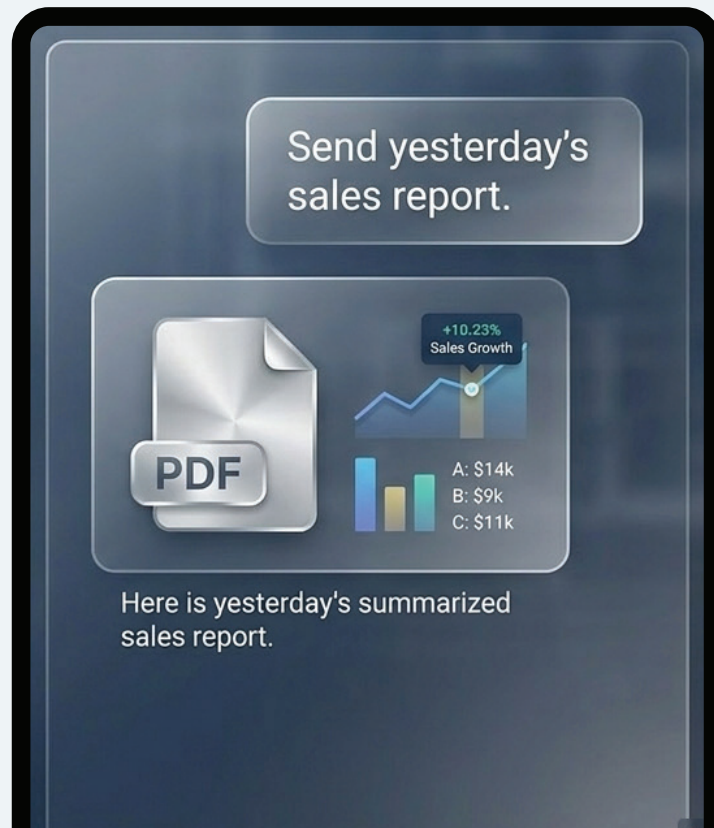

Business Intelligence Dashboards

- Bespoke Business Intelligence Dashboard to transform raw data into highly actionable, real-time insights for top level executive for decision making.

Chabot for Reports Delivery

- An AI-driven conversational interface that eliminates reporting bottlenecks and automatically generate reports and share with registered clients.
- Allows executives and authenticated clients to securely request and instantly receive automated, fully-formatted business reports directly via standard messaging platforms.
